Florida FOP Members and Peer Support Response to PTSS, Mental Health, and Addiction

The Florida FOP and Transformations Treatment Center Presents a Career Saving Training

The Florida State FOP Conference will be hosting a live, in-person training for our next Conference at the Rosen Shingle Creek. This will be a 4 hour training and we will have four guest speakers. The presentation will be from the first responder staff of the Help For Our Heroes Program at Transformations Treatment Center in Delray Beach, Florida.

This four-hour training showcases how first responders suffer in silence and are afraid to ask for help from their command Staff. We will discuss why so many first responders "suffer in silence" because they feel they cannot access treatment without being "outed." This session will guide and direct the peer support officer and the FOP Union representative how to help the first responder get the help they need. Our FOP membership must know the employees' rights to the Federal Medical Leave Act (FMLA) and how it pertains to public service. This will be an in-depth look at what a true first responder treatment center looks like and how the first responder is able lead a successful life after treatment. The objective of this training is to show FOP members and peer support that PTSS and trauma experienced on the job is a treatable event and your first responder can lead a productive life. There will be a Q/A during the last hour of this training with attendees. Transformations Treatment Center (Help For Our Heroes Program) is an approved and certified treatment center by the National Fraternal Order Of Police (FOP) Wellness Board.

Training Details

Conference Registration Required

This training is for all associated FOP groups, wellness personnel and the spouses of First Responders.

**FEB
17th**

1:00 PM-5:00 PM
